The future is already here!

R&D PROJECTS

Advanced Manufacturing assistance and training for SME Transformation

Efficient decentralized sustainable food production

An Open Innovation Ecosystem for exploitation of materials for building envelopes towards zero energy buildings

A European "shield" against colorectal cancer based on novel, more precise and affordable risk-based screening methods and viable policy pathways

Institutionalised cross-sector PLanning and dedicated capacity building to ENable small and medium-sized municipalities to develop and monitor sustainable strategies for the Transition to clean energy

Vertical Innovations in Transport And Logistics over 5G experimentation facilities

ADRIATIC: cooperAtion unDerwater for efficient operATIons vehICles

Multi-layer Connected Factories

Fintech Platform Solution for Sustainable Energy System Intracting and Contracting boosting energy saving and renewable energy

From vineyard to bottle – trace sustainable practices in wine-growing under full transparency

Solutions for GHGs emissions mitigation for the mixed farming systems across different European climates (ERA-Net ICT-AGRI)

Promoting capacity building and knowledge for the extension of urban gardens in European cities

Black sea fLloating Offshore Wind

A Distributed Open Marketplace for Europe Cloud and Edge Services

Flexible & Improved Border-Crossing Experience for Passengers & Authorities

Intelligent PREdictive Maintenance for Aquaculture Systems

A novel and green mobile One Health laboratory for (re-)emerging infectious disease outbreaks

Evidence-based Participatory Decision Making for Cancer Prevention through implementation research

Research data marketplace for technology transfer built as a software and data carpentry

Wallachia eHUB – Digital Innovation Hub

Training framework on Underwater TecS as key enabler for blue careers development

Critical infrastructure High accuracy and Robustness increase Integrated Synchronization Solutions

Data Spaces For Flexible Production Lines And Supply Chains For Resilient Manufacturing

Climate smart food innovation using plant and seaweed proteins from upcycled sources

IoT platform for monitoring of the museum environment

Research, Intelligence And Technology For Heritage And Market Security

Flexible, multi-modal & Robust FREIGHT Transport
