

ARROWHEAD
fPVN

fvpn.arrowhead.eu
**MAKING
MANUFACTURING
SMARTER &
FASTER**

Objective 1
flexible production
value networks

Objective 2
industrial productivity and
flexibility

Objective 3
autonomous and evolvable
interoperability

Arrowhead fPVN encourages relevant and automated information exchange in production networks to boost performance and adaptability. A technology will be developed to interpret and convey information across systems and stakeholders. This helps industrial networks adapt to changing conditions and needs and resilience.

This project has received funding from Chips Joint Undertaking under grant agreement No 10111977. The JU receives support from the European Commission.
